OUR CHALLENGE

The design and implementation of a gender action plan for climate change policy

Proposal of technical guidelines to promote and strengthen gender approach in climate change management (Ministry of Environment and Sustainable Development)

Recommendations to **incorporate the gender approach** into the conceptual framework of the **National Policy on Climate change**

Construction of a comprehensive vision of **climate change with a territorial and sectoral approach**, incorporating the different dimensions of rural development and cities, so that it is low carbon, **sustainable and resilient to the climate**

Incorporates recommendations to **encourage the adequate participation of women in the decision-making and climate change** management processes

Rural women in Colombia

**UNDERSTANDING THE
RELATIONSHIP BETWEEN
GENDER AND
ENVIRONMENT
IS KEY TO ADDRESSING
ENVIRONMENTAL
CHALLENGES
IN AN EQUITABLE AND
SUSTAINABLE WAY**

- Rural women in Colombia represent 21% of all women in the country. (DANE, 2014)
- Rural women in Colombia constitute 48.31% of the total rural population (UN-REDD, 2018)
- 93% of the women who live in rural homes carry out unpaid domestic work activities, and dedicate 8 to 12 hours in such activities (ENUT, 2012 – 2013).
- Extreme poverty affects 22% of households headed by women, compared to 17% of households headed by men
- 29% of rural women have suffered physical violence from their partner, and 27,7% economic violence (ENDS,2015)
- 7% of rural women have suffered sexual violence (ENDS,2015)

Gender policies and architecture in Colombia

Gender Equity for Women: State policy by the National Council
for Economic and Social Policy

Conpes document 161. Gender Equity for Women. (2013)

Public policy: Law that establishes norms to **favor rural women**

Law 731 of 2002

Human rights policy of the mining and energy sector

Chapter for the **Incorporation of differential and gender approach**
in the Human Rights Policy of the mining sector

Presidential Council for The Equity of Women (CPEM)

National level institution for the design, promotion and strengthening
of public policies for the equity of women

**Vice-President of the republic. Strong leadership in the promotion
of equity for women in public policy**

First woman vice president in the history of the country

2018 - 2020

The NDC has enabling measures and strengthened institutional capacities for its implementation with the **incorporation of the gender approach in the national policy of Climate Change**

The mitigation component of the NDC has approved implementation plans in the ministries (Commerce, Industry and Tourism, Mines and Energy, Transportation, Housing, City and Territory, and Agriculture and Rural Development) with goals to 2030 and **with gender considerations**

NDC Support Programme Colombia

Roadmap defined for the construction and approval of the "Strategy 2050," for the management of climate change **with incorporation of a gender approach**, through inter-institutional coordination for compliance with the NDC by the ministries and various international cooperation programs.

The mitigation component of the NDC has quantitative commitments in mitigation of the private sector, monitored through the corporate reporting platform
